

Specification for the Data logger:

Circutor- MyeBox 1500 or similar

1. Measure of main electrical parameters; consumed and generated energy; Quality network parameters.
2. True RMS measurement (TRMS)
3. 5 voltage measurement inputs
4. 5 current measurement inputs
5. Voltage quality events according to **EN 50160**
6. Transient recording
7. Waveform associated with quality and transient events
8. Periodic waveform recording
9. Email alarm
10. Automatic detection of current clamps
11. Identification of phases with colors
12. **PowerVision Plus Compatible** (computer analysis software)
13. EEPROM Current clamps compatible
14. System Event Log (EVA)
15. Automatic firmware upgrade
16. Wi-Fi Communications
17. 3G communication
18. microUSB port
